

ZDHC MRSL – Zero Discharge of Hazardous Chemicals programs

The ZDHC Roadmap to Zero program provides a list of limit values for various pollutant groups in chemicals. By complying with these limit values, we aim to ensure that our materials meet the environmental requirements of this program. It is important to us that fewer pollutants are released into the environment during production.

We would like to share the following statement about our approach to the ZDHC MRSL Standards:

The Groth & Hermanns Group declares that it is familiar with the ZDHC MRSL. As part of its sustainability strategy, the Group has obtained confirmation from its suppliers regarding the textile auxiliaries and dyes they use. The Group also ensures that its materials are produced in accordance with ZDHC MRSL standards.
